**Superfast Mono Component Polymer Sealant Cartridge**

*Install a sink in just 10 seconds.*

- Run a 3/4 inch bead, run the excess around the rim.
- Don't need to use other Caulk
- No clamps or hardware required
- Superfast sealant

MS60 Black Mamba FHG is made of monocomponent MS polymer adhesives. These adhesives react with the humidity in the air and offer optimal sealing even in under pressure. The main advantage of this product is the speed at which skin can form as well as the curing speed in which 100% of the active matter reacts.

**A Must Try! Satisfaction Guarantee!**

**Features:** Flexible disc to sand wet or dry stone. Set includes grits from 60 to 3000. These are diamond pads (as opposed to regular abrasives which are silicon carbide) and work much better and much faster.

**Benefits:** Replaces traditional abrasive disks. No surface burning during finishing stage. Discs have a significantly higher duration and produce excellent results on all materials. Great polishing on all flat surfaces.

**Applications:** Stone materials, quartz, engineered stone, marble, granite.

**Warning:** Do not use 3000 grit on quartz because it causes an orange peel effect.
